

What can your children do this summer at Challenge Camp?

They can build their own cutting edge 3D printer
They can design their own Pinball machine
They can train to be a Ninja Warrior
They can utilize forensics to investigate a crime scene
They can star in "Shrek The Musical Jr." and "Matilda, the True Story"
They can analyze Cyber Security risks and strategies
They can code with HTML, Java and Python
They can chop, slice and dice their way to healthy cooking
They can become a littleBits engineer
They can enlist in the Drone Flight School
They can learn to buy low and sell high
They can be captains of "Minecraft" and "Starcraft" missions
They can serve as Congress people and learn how a bill becomes a law
They can sculpt their favorite mysterious tree
They can take a byte of RaspberryPi
They can dazzle their friends with mystifying magical illusions
They can master Photoshop techniques
They can launch their own model rockets
They can build and drive a remote control Off Road Racer
They can become Quiz Bowl Champions
They can create their own wearable technology
They can produce, direct and act in their own short film
They can construct their own personal computer
They can form a complex Rube Goldberg machine to complete a simple task
They can travel to the moon and beyond in NASA Space Science
They can develop a business plan to raise money for children's charities

All of these exciting activities and much more will be occurring
at Challenge Camp 2018, our 38th spectacular summer!
