

# What can your children do this summer at Challenge Camp?

They can experiment and print 3D model prototypes  
They can unlock clues to solve escape room challenges  
They can learn advanced gaming strategies for Fortnite  
They can become DJ mix masters  
They can train to be a Ninja Warrior  
They can design their own Pinball machine  
They can explore reality in their own VR world  
They can develop codebreaking and espionage skills.  
They can star in "Annie" and "The Legend of Mulan"  
They can code with HTML, Java and Python  
They can chop, slice and dice their way to healthy cooking  
They can see their DoodleMatic avatar come to life  
They can enlist in the Drone Flight School  
They can learn to buy low and sell high  
They can design and create scale model architecture  
They can experiment with chromatography and crystallization  
They can dazzle their friends with mystifying magical illusions  
They can master Photoshop techniques  
They can launch their own model rockets  
They can build and drive a remote control Grand Prix car  
They can create wearable technology  
They can produce, direct and act in their own short film  
They can build their own computer  
They can form a complex Rube Goldberg machine to complete a simple task  
They can develop a business plan to raise money for children's charities

All of these exciting activities and much more will be occurring at
